

HRS 5 SMD Tape Splicer for ALL Sizes & Materials

- Avoids Stoppages In Automatic Pick And Place Machines
- Enables Use Of Short Lengths Of Component Tapes
- Allows Missing Leader Tapes To Be Replaced.

The HRS 5 Tape Splicer

One hand held set of tools and pre punched joining tapes for all SMD tape widths and materials.

Component carrier tapes are joined at the sprocket hole margin; tape widths are therefore irrelevant.
Pre punched and cut joining tapes are also used to link the cover tapes and under the component pockets.
